

PRIUS project: fostering of Globally-Leading Researchers in Integrated Sciences

Susumu DATE, Osaka University, Japan

date@ais.cmc.osaka-u.ac.jp

This talk introduces an educational activity named PRIUS project being promoted at Osaka University, Japan. PRIUS project is an educational challenge toward the fostering of globally-leading researchers in integrated science. For this challenge Osaka University has been collaborating with universities and research laboratories in the Pacific Rim through PRAGMA (pacific rim applications and grid middleware assembly) so that osaka university provide students with opportunities to learn the way to think with international perspective as well as cutting-edge information technology including Grid In this talk the framework of PRIUS project, its achievement, and our future direction are mainly introduced.
