

## **EU-FP7 NCP-Taiwan**

**Jeremy C. Sykes**

EU-FP NCP-Taiwan Office, Taiwan

The National Contact Point-Taiwan Office (NCP-Taiwan), established in September, 2008, seeks to facilitate the engagement of Taiwanese industry, universities, research institutes and their researchers with the European Union's Seventh Framework Programme (FP7) and other related EU opportunities for mutual collaboration between the European Union and Taiwan. This presentation will provide information about the activities of the NCP-Taiwan office, and provide conference participants with information about how the office can provide assistance to them through information distribution, seminars, organizing exchange visits, providing technical assistance in finding research funding partners in the EU, and other activities designed to increase awareness of, and involvement in, new collaborative opportunities with the European Union research establishment.
