

Introduction of GSDC project and activities

Recently, Korean government has launched new project, GSDC, to promote global collaboration in data intensive researches by providing computing & storing infrastructure and technical support. In this project, currently, we support ALICE, CDF, Belle, LIGO, STAR, Neuroscience, and etc. In this talk, we will show the history of GSDC project and grid activities including ALICE Tier1 testbed, Tier2, OSG integration to support CDF, Belle & Belle2 support. And also, the future plan will be shown.
