

## **GISELA - Building the future of e-Science in Latin America**

**Bernard Marechal**

CETA- CIEMAT

The EC co-funded GISELA ([www.gisela-grid.eu](http://www.gisela-grid.eu)) project, respectively daughter and granddaughter of the EELA-2 and EELA projects, aims at implementing a plan for the long-term sustainability of its e-Infrastructure in Latin American and the Caribbean and at providing a full support to the Virtual Research Communities spanning Latin America and Europe and using this e-Infrastructure. The project organization and results after six months of existence will be presented, emphasizing the preparation of the handover to CLARA (Cooperación Latino Americana de Redes Avanzadas) and Latin American National Research and Education Networks (NRENs).
